TO WHOM IT MAY CONCERN

As a manufacturing company supplying the large South African retail chains, we were looking for a manufacturing programme which would integrate with PASTEL Partner. We found that in Xperdyte. Not only does it integrate well, it also provides us with all the functionality of a manufacturing programme at a fraction of the price of other programmes out there.

Good after sales service is critical. Xperdyte has that covered. We find their service excellent. A very big bonus is that, unlike other programmes, we have direct access to the programming team, who are always willing to listen to suggestions and very quickly integrate them into their upgrades. No long waiting periods turns this generic programme into the look and feel of a bespoke programme.

I would recommend Xperdyte without hesitation.
