To whom it may concern:

We are a Manufacturing company dealing in the Food Industry producing mainly Fruit Pulp.

Xperdyte Manufacturing Software was recommended to us by our Evolution Support Company AS2 Accounting Software Solutions as a solution to accurate weighing and labelling of weighed items.

Their software has made the Manufacturing Process easier and more visual, producing more powerful reporting than before only using the Evolution Bill of Material Module.

It has also for the first time included the Fruitique Quality Department in plotting QC parameters on Xperdyte and producing COA'S that are sent to our External Customers.

We use all of the modules from Bills of Material, Works Order Processing, MRP, Production Scheduling and Quality Control.

We have found the Xperdyte Staff to be friendly and professional in meeting our individual needs at Fruitique.

Xperdyte staff have provided excellent on the job training and we have found the ongoing support very responsive.

Frequent updates and enhancements keeps our programme up to date with current needs.

The Xperdyte team always are open to suggestions to improve the Manufacturing Software to meet our individual needs.

Kind Regards
